Hesham Saad Selim

Senior Frontend Developer · Angular Specialist

heshamsaad1515@gmail.com +20 127 579 4590 linkedin.com/in/hesham-saad-a28429215

PROFESSIONAL SUMMARY

Frontend developer with 6+ years of experience building scalable enterprise web applications using Angular. Proficient in Angular Material, RxJS, NgRx state management, and CI/CD deployment pipelines. Experienced in delivering responsive, RTL-ready, localized applications for enterprise clients in the MENA region. Strong background in IIS deployment, Jenkins pipelines, and Azure cloud infrastructure.

TECHNICAL SKILLS

Languages & Frameworks
Angular 14–17, TypeScript, RxJS, NgRx, Angular Material, HTML5, CSS3, SCSS, Bootstrap
Architecture
Component-driven design, Domain-Driven Design (DDD), ControlValueAccessor, OnPush Change Detection
State & Data
NgRx, RTK Query (React), REST APIs, JSON, HTTP Client
DevOps & CI/CD
Jenkins, Git, Azure VM, GCP VM, IIS Server, Windows Firewall, web.config (URL Rewrite)
Tools
VS Code, Datadog, Angular CLI, npm, Postman, Jira
Spoken Languages
English (Native), Arabic (Native), Turkish (Native), Russian (Mid Level)

WORK EXPERIENCE

Senior Frontend Developer
Nov 2025 – Jul 2026
Alasi Tech | Remote

- Lead frontend development on the Rawafd_Angular (alasi-frontend) enterprise project using Angular 16+.
- Architected shared reusable modules including Cities Management (AR-29), Phone Picker (ControlValueAccessor), and Angular Material date picker components.
- Resolved critical Angular OnPush change detection infinite loop caused by a getter using .map(); implemented cdr.markForCheck() for async form population.
- Fixed routing conflict where (click)="close()" handlers suppressed [routerLink] navigation on sidebar child routes.
- Built and maintained Jenkins CI/CD pipeline auto-deploying Angular builds to branch-specific Azure/GCP VMs (QA, Dev, Production).
- Configured IIS web servers with proper web.config URL rewrite rules and MIME types for Angular SPA deployment.
- Implemented Git workflows including branch naming conventions, commit message enforcement, stash, and rebase strategies.

Senior Frontend Developer
Nov 2024 – Nov 2025
EZ Eats | Remote

- Led frontend development on the EZ Eats enterprise ordering platform using Angular 16+.
- Architected shared reusable modules including customer address management, phone number picker (ControlValueAccessor), and Angular Material date picker components.
- Resolved critical Angular OnPush change detection infinite loop caused by a getter using .map(); implemented cdr.markForCheck() for async form population.
- Fixed routing conflict where (click)="close()" handlers suppressed [routerLink] navigation on sidebar child routes.
- Built and maintained Jenkins CI/CD pipeline auto-deploying Angular builds to branch-specific Azure/GCP VMs (QA, Dev, Production).
- Configured IIS web servers with proper web.config URL rewrite rules and MIME types for Angular SPA deployment.
- Implemented Git workflows including branch naming conventions, commit message enforcement, stash, and rebase strategies.

Angular Developer
Nov 2021 – Oct 2024
NeoTutum | Istanbul, Turkey

- Developed and maintained enterprise-grade Angular applications over 3 years in an international team environment.
- Built scalable component libraries and reusable modules using Angular Material and TypeScript.
- Implemented complex reactive forms and state management solutions using RxJS and NgRx.
- Collaborated with cross-functional teams across different time zones to deliver product features on schedule.
- Performed code reviews, wrote unit tests, and maintained high code quality standards in an Agile environment.
- Integrated RESTful APIs and contributed to frontend architecture decisions for SPA performance optimization.

KEY PROJECTS

Rawafd Angular Platform
Enterprise Angular application with shared modules, Angular Material UI, IIS deployment, and Jenkins CI/CD. Features OnPush optimization, DDD architecture, and full RTL/localization support for Arabic-language users.

Reusable Component Library
Built PhonePickerComponent, DatePickerComponent, and shared Create/Edit form components implementing ControlValueAccessor for seamless integration with Angular reactive forms.

EDUCATION

Bachelor of Computer Science
Sakarya University | Sakarya, Turkey
2016 – 2020

Frontend Development Certification
Information Technology Institute (ITI)
2022
